

```

1 #include <stdio.h>
2 #include <stdlib.h>
3
4 float DIV (float a);
5 int main()
6 { float x, division;
7   printf("Enter any number");
8   scanf("%f",&x);
9   division= DIV (x);
10  printf("The value of the number divided by two is: %f",division);
11  return 0;
12 }
13
14 float DIV (float a){
15     float divi=a/2;
16     return divi;
17 }
18

```

```

Enter any number 22
The value of the number divided by two is: 11.000000
Process returned 0 (0x0)   execution time : 1.266 s
Press any key to continue.
