Original Question

Karolina2003

Is the internet good or bad for people?

Hi everyone. I'm writing an essay. Can you help?

Here's the essay question: The internet has made our lives better. Do you agree or disagree? What are your experiences of the internet? Do you think the internet helps us make friends, or is it bad for us? Thanks for reading, and for any answers!

easier to work and contact people. These people say that there are many other You can watch TV on the internet, you can buy things at any time, and you can learn a lot. But the main of the internet is that it makes many things possible that were not possible before. For example, we can talk to someone on the other side of the world, or find old friends at the click of a mouse.

Some people think that the internet is a **positive** thing. It helps us and **improves** our lives. It's easier to work and contact people. These people say that there are many other **benefits**. You can watch TV on the internet, you can buy things at any time, and you can learn a lot. But the main **advantage** of the internet is that it makes many things possible that were not possible before. For example, we can talk to someone on the other side of the world, or find old friends at the click of a mouse.

However, other people think that the internet has many It stops us from spending time with people in real life, and makes us lonely. Another thing is that we spend too much time in front of a computer or a screen. This our bodies and makes us unhealthy.

However, other people think that the internet has many **disadvantages**. It stops us from spending time with people in real life, and makes us lonely. Another **negative** thing is that we spend too much time in front of a computer or a screen. This **affects** our bodies and makes us unhealthy.

In fact, many people want to take a break from the internet. In the UK, there are special holidays where there is no internet, and you can't take your mobile phone. Your boss cannot email you, and you can finally relax.

The internet

More than 2 billion people use the internet, and many people think that it is something new. Most people didn't start to use the internet until the 1990s. **However**, a very simple internet started in the early 1960s in the US.

Smartphones

Like the internet, smartphones are not new. The idea of telephones together with computers began in the early 1970s, ☒ smartphones did not become popular with most people until after 2010.

Smartphones

Like the internet, smartphones are not new. The idea of telephones together with computers began in the early 1970s, **but** smartphones did not become popular with most people until after 2010.

Email

The word 'email' is not very old. It comes from around 1993. ☒ the first message was sent between two computers in the early 1970s.

Email

The word 'email' is not very old. It comes from around 1993. **However**, the first message was sent between two computers in the early 1970s.

Computer programs

Most people don't know how to write or understand a computer program, ☒ this is one of the oldest technologies! Some people believe that the first computer program was in 1842. It was by Ada Lovelace, for the 'Analytical Engine' – a very simple, early computer.
