

Patient  
Voll 5

In a dentist appointment system, Salma, after finishing the registration process, can view available doctor-time slots, and can choose to reserve an appointment for a slot if that slot is free and suites her. After reserving a time slot, a confirmation notification and email are sent to her mobile app. The doctor and receptionists can view upcoming appointments, but only doctors can approve or reject these appointments. At any time, Salma can change or cancel the appointment she made before. Doctors and receptionists can chat with the patients.
