Sentence Stacker Show Dashboard Exercise 2: Reading for detail

Museums often have more **artefacts** than they can **display**. Because the museums are there for the **benefit** of the public, something must be done with these items. In some cases they can be kept in the museum for **research**. Another solution is to give them to other **museums** which can look after them **better** or exhibit them.

When we visit museums, we are often amazed by all the artefacts that are on display. However, for many museums, the items that are exhibited are only a small part of the total collection. Museums do not really own what is in their collections but keep it for the benefit of the public. Because of this, it does not seem right that so many things are not being shown to the public, simply because there is not enough space. This essay will look at what alternatives there are to this situation. It will conclude that there are a number of ways in which museums can reduce the number of artefacts that cannot be exhibited.

Many museums around the world have a lot more artefacts than they can display at any one time. For example, the Natural History Museum in London has 70 million objects in its
