absoeisli

* Scrap :- اسے وہی material یا immaterial کیلئے کہا جاتا ہے جو کوئی
use کرنے کے لئے نہیں کھینچ سکتا۔

⇒ جیسا کہ اسے وہی material کہا جاتا ہے جو کوئی

Cash or A/R XXX

Scrap Rev XXX (immaterial) ←

common to all JOP JOP کی وجہ سے material
all JOP اسے وہی material کہا جاتا ہے جو کوئی

cash scrap rev common to all
A/R material control XXX JOP
MOT control XXX

cash or A/R material control XXX JOP کی وجہ سے
WIP control XXX

* Total spoilage :-

TS = (beginning WIP + Units started) - (Completed + Ending WIP)
Units

and: TS = Normal spoilage + Abnormal spoilage.
↓ ↓
Units Units
rate X Units good completed

81. HD

* the equivalent units of spoilage are calculated based on the percentage of inspection level.

* if the spoilage units have sales value (sales price or disposal value), then the sales value is eliminated.

have to be subtracted from the costs as follows:

Normal spoilage \rightarrow sales value \rightarrow J12 (1)

abnormal spoilage \rightarrow $\cancel{\text{J12}}$ (5)

SOT \rightarrow gives $\cancel{\text{J12}}$ sales value \rightarrow J17 (5)

the cost of spoilage units = \$1000 - J12

\rightarrow \$700 J16 loss per unit

Net cost = $1000 - 700 = 300$ " " "

\rightarrow \$300 loss

* in the Job-costing system:-

Normal spoilage

attributable common to
to specific job all jobs

Abnormal spoilage

WIP to Loss

from Abs.

No Entry WIP To M&H

\hookrightarrow disposal value \rightarrow J12

*Disposal Value:- هو القيمة التي ي丟掉 بها العذاءات المطلقة
 كندرها هي قيمة انزال العذاءات المطلقة
 ابسطها بمحردوه معينة وهو DV يعني
 طلاقة ومحكمها ببيع الواسطة مقابل \$600 وبالناتج :-
 $DV = 5 * 600 = \$3000$
 وبذلك تكون قيمة 5 spoiled units في DV
 ويكون العدد كالتالي :-

Material control 3000

WIP control (specific job) 3000

هذا المترقب للانتاج WIP يعني
 المنتجات النهائية في مرحلة الإنتاج
 ، الذي تم إنشاؤه من مواد

Cash 3000

Material control 3000

، no Entry (specific job) :- DV يعني

EXP:- in the company , the Units spoiled are 5 unit
 and the cost assigned prior to the inspection
 point are 2000 per unit , when the spoilage is
 detected , the spoiled goods are inventoried at \$600
 per unit , the net disposal value .

Specific Job → NS (Normal Units)

1) Total cost of spoiled units?

$$TC = 5 * 2000 \rightarrow \$10,000$$

2) Net cost of the normal spoilage?

$$10,000 - 3000(DV) \rightarrow \$7000$$

3) Total cost of the 45 Units (good units)?

$$(45 * 2000) + 7000 (\text{cost of NS})$$

$$= 90,000 + 7000 \rightarrow \$97,000$$

good units NS

4) Cost per good unit?

$$97,000 / 45 = \$2,155.56$$

* Normal spoilage common for all jobs

Material control 3000

MCH control 7000

WIP control (specific job) 10,000

MCH control 10,000

WIP control 10,000

← DV

For example, if the company produced 140 good units from all jobs in a given month:-

1) The \$7000 of normal spoilage overhead costs would be allocated at the rate of ?

$$7000 / 140 = \$50 \text{ per good unit.}$$

2) Normal spoilage overhead costs allocated to the 45 good units in the job ? $45 * 50 = \$2,250$

3) Total cost of 45 good units ?

$$(45 * 2000) + 2,250 = \$92,250.$$

4) cost per good unit (45) :- $92,250 / 45 = \$2,050$

الآن حساب التكلفة الجيدة في كل وحدة جيدة هي $\$2,050$ ←
وهي 140 وحدة جيدة في المجموع 45 وحدة جيدة،
لذلك التكلفة المطلوبة لـ 45 وحدة جيدة
هو $45 * \$2,050 = \$92,250$.

M&H control 16,000

W&P control 16,000

* For Abnormal spoilage:-

Material control 3000

Loss from Abs 7000

WIP control

(10,000)

good units 11 units loss due to Abs 11 units
115 units

* New Job numbers

D) Total cost of 45 good units?

$$45,000 \times 2000 = \$ 90,000$$

new job number 5 units

e.g. U 115, J 115, S 115, abnormal spoilage 115

* Rework attributable to a specific job (normal)

WIP control 3800 (specific job)

Material control 800

Salaries and wages payable 2000

Motl allocated 1000

* Rework common to all job :- (normal)

WIP control JN. Motl control

* Abnormal Rework :- ~~more to discuss~~

3800 ctns loss from abnormal reworks ~~جنيهات~~
• ~~التي تحدث في المصنع~~

ADR might - process costing (Job costing) ~~*~~
• Losses

Loss normal reworks go to job - process costing ~~*~~
Normal rework common to all job.

Waste scrap goes - process costing ~~*~~
common to all job
• ~~المجهود والجهد~~ - job costing ~~will be~~

* Scrap :- material and sold slowly :

Scrap attributable to a specific job:-

Material control XXX

WIP control XXX

Vicks

water

rice, le

liveries

Scrap common to All jobs:-

Material control XXX

M&H control XXX

* Reused of scrap:-

WIP control XXX

Material control XXX
