Department of Computer Science

COMP133 – Computer and Programming
(Second Semester – Spring 2023/2024)   9th May 2024

Quiz#3 (Duration: 20 minutes)   student name:

Write a C program that **receives** students grades, the program will keep asking for grades until we have 5 accepted grades (between 60 and 99. For each valid grade, prints the numbers between 60 and that grade.

Examples: 66, this is a valid grade (Accepted), print: 60,61,62,63,64,65,66

You must use a function that prints the grades from 60 until the given grade.

This is individual work, please do not share your code with others.

Submit the answer on the ITC (only the *main.c* file)

Good Luck
