COMP133 - Computer and Programming  
(Second Semester - Spring 2023/2024)

Quiz#1 (Duration: 20 minutes)

student name: \_\_\_\_\_

An employee received 595 ILS after working for 4 days. Write a C program that calculates the monthly salary in ILS شيكل Then convert his salary to USD دولار ,

The program starts by showing a menu for the user as follows:

“Please choose one of the following options:”

“1. Calculate the ~~yearly~~ salary in ILS”

“2. Convert the salary to USD (1 USD = 3.69 ILS)” → *monthly*

Notes:

*30 يوم 25 اشهر*

1. You must use the **switch** to check the user option. The switch receive the user option and decides which functions to call.
2. We need 2 functions: **monthly\_salary\_ILS**, and **salary\_in\_USD**. Print the results inside the functions.

This is individual work, please do not share your code with others.

Submit the answer on the ITC (only the main.c file)
